CCTV Camera & Analytics

We offer you an extensive portfolio of innovative, high-quality economic products and security for systems. CCTV cameras are the eyes of any video surveillance system. The range of camera SD and HD Auto Dome, Dinion and extreme series has set industry standards for image quality, automatic and programmable features.

Different Types of CCTV

- Dome Camera.
- Bullet Camera.
- C-mount Camera.
- Day/Night Camera.
- PTZ Camera.

DVR or NVR.

The main difference between the network video recorder (NVR) and digital video recorder (DVR) is in how they process raw video data. A DVR converts analog footage into a digital format, while an NVR typically only works with digital footage. DVR systems process data at the recorder, while NVR systems encode and process data at the camera before transmitting it to the recorder for storage and remote viewing.

From the latest in keyboards and mice to advanced networking devices, we ensure seamless online ordering and prompt delivery through our trusted courier service. Experience the ease of upgrading your tech with shiftechbd.com.

Ip Phone & Pbx (Intercom)

In short, PBX (Private Branch eXchange, private branch exchange) is the PBX, which is widely used in corporate offices, which greatly improves the efficiency of corporate affairs. With the development of the Internet and IP, some of its shortcomings have gradually emerged: dedicated, expensive, and CTI (Computer Telephony Integration) or VoIP cannot be easily implemented. To solve these problems, IP PBX appeared. IP PBX is based on the TCP / IP protocol and uses the principle of packet switching to implement the functions of traditional PBX on Ethernet.

Access Control & Time Attendance.

Shift Tech BD. Always provide world class access Control System devices and Software that integrates the leading-edge security technologies with innovative networking capabilities in order to bring you full feature security solution serving any size application. We always provide modern devices in keeping with the times.

Pa & Conference System.

A PA system (public address system) amplifies and distributes sound to large audiences. It includes microphones, mixers, amplifiers, and speakers. PA systems are used in conferences, live events, and outdoor gatherings. Conference systems are specialized setups designed to facilitate clear communication during meetings, conferences, and other collaborative gatherings. These systems typically include microphones, speakers, and audio processing equipment. Their purpose is to ensure that participants can hear and be heard effectively, even in large conference rooms or auditoriums.

Fire Detection and Alarm Systems.

A fire detection and alarm system (FDAS) comprises manual and automatic alarm-initiating devices. These devices activate upon detecting fire, smoke, flame, or heat. Examples include smoke detectors, heat detectors, and fire sprinkler systems. These systems play a critical role in ensuring safety by providing early warnings and facilitating timely responses.

Computer Sales & Service

Shift Tech Bd is a company based in Dhaka, Bangladesh. They specialize in computer sales and services. Their mission is to provide quality computers and efficient servicing to their clients. Whether you're looking to purchase computer for your Corporate of Office or need technical assistance, We also retail computer parts, Shift Tech Bd aims to meet your needs.

Networking System

A networking system connects computers and devices, allowing data exchange and communication. Types include LAN (Local Area Network), WAN (Wide Area Network), MAN (Metropolitan Area Network), and PAN (Personal Area Network). Components like switches, routers, and access points facilitate seamless connectivity. Networking systems play a vital role in modern communication and collaboration.

Gps Tracker

Shift Tech Bd also provide GPS Tracker for Bus, Truck,CNG,Motorcycle. GPS tracker is a device that uses the global positioning system (GPS) to track the movement of people, objects, or animals. It provides real-time location data and is commonly used for monitoring vehicles, loved ones, or valuable assets. For corporate services, we install trucking devices in all company vehicles under a specific package.

Ro Water Purifier

Term 'Reverse Osmosis', an RO water purifier, is considered the best in the market. This water purifier applies a force along the area of concentrated water. This water flows through a semi-permeable membrane, resulting in Pure RO Water. RO Water Purifier is our own product. We guarantee 100% safe and clean water.
